SPECIAL FOR TILERS**

# NEW BELLOTA LASER RANGE

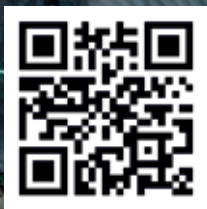

# PROJECT YOUR PROFESSIONALISM

With the launch of the NEW LASER RANGE, Bellota has once again taken a step forward in technology and innovation.

The range consists of a measuring device and five high-performance laser levels that will speed up and guarantee your professional tasks.

These intuitive and competitive tools have the resistance and quality for which our brand is renowned.

## THE LASER RANGE THAT MAKES THE DIFFERENCE

### ► RESISTANCE

Dustproof, shockproof and splashproof. Our laser levels and meter are robust and resistant. Always up to the task in the most demanding working environments (IP54).

### ► ACCURACY

Because millimetres count, and count for a lot, the new range offers you a very high level of accuracy ( $\pm 0.3\text{mm/m}$ ) in laser levels.

### ► RELIABILITY

Fast and reliable. This is how you work with the Bellota Laser Range, thanks to the high reliability offered by the measuring device and the levels.

### ► VISIBILITY

All the products in the range offer good visibility and a long reach. We recommend using laser levels with green light to work in bright spaces and reduce the user's visual fatigue.
